Dear Sir, Madam,

**Recommendation letter for
the International Symposium on Energy**

I had the chance to be invited at the 5th International Symposium on Energy Challenges and Mechanics and I really enjoyed the experience. What made it valuable was the wide array of scientific contributions of outstanding qualities on global energy problems, while avoiding the pitfalls of large congress where the valuable contributions are diluted and a massive audience makes it almost impossible to interact with anybody. I therefore recommend anyone who wish to attend to go there and enjoy the famous Scottish hospitality and get exposure to various fields of research in the energy area.

I sincerely hope this series of congress will continue on its valuable mission,

Sincerely yours,

Michaël Deschamps
